

UNIVERSITY OF HAWAI'I CANCER CENTER

In Hawai'i more than 6,000 of our friends and family are diagnosed with cancer each year and another 2,000 die from the disease, making it the second leading cause of death in the state.

Join us to end cancer as we know it

UH Cancer Center undergraduate, graduate and postdoctoral students work with faculty and staff every day to reduce the burden of cancer in Hawai'i through research, education and improved patient care.

Our major research programs include:

Cancer Biology | Cancer Epidemiology | Cancer Prevention and Control

Founded in 1971, the Center is one of only 69 research institutions designated by the National Cancer Institute.
